Implant 101
Beginning Dental Implants Seminar for Doctors and Staff
August 21 - 22, 2015
Lecture & Hands-On Live Patient Surgeries

Presented by:
Dr. Wesley Mullins
Megan Ridenour

Co-Sponsored by:
Approximately only 10% of general dentists place implants in the U.S. according to a study done by the American Academy of Implant Dentistry in 2006. Are you one of them? If not, what is holding you back?

Are you concerned about choosing the right implant system, education and training, technology, and costs? You are not alone. That’s why 90% of general dentists refer their patients to others instead of keeping the business in-house.

With Implant Solutions as your partner, we break down the “who, what, why, when and how” to help you understand how profitable implant dentistry can be. From CT surgical guides, implants and restorative options, we are your one-stop-shop resource center.

Let us be your implant guide, join us on August 21-22, 2015 for our Beginning Implant 101 lecture and live patient surgeries seminar.

About Implant Solutions

Implant Solutions is a full-service dental laboratory, offering implant systems like Argon K3 Pro, CT guided surgery and Dental Crafters restorations. With a combined experience of 34+ years, our family owned companies are committed to dentists and the patients they serve.
We believe that implant dentistry should be taught from a prosthetic approach and understand that being a single provider for implant dentistry can increase case acceptance for the patient. We also understand that predictability and consistency is of the utmost concern as mistakes are costly. Dental implants can provide you with the level of consistency, predictability, and profitability like no other treatment offered to patients today. This course is designed to break through the clutter, so dental implants are no longer confusing and daunting.

Dr. Wesley S. Mullins will take you through the history of dental implant design and engineering. He will guide you through the treatment planning process of single and multiple unit posterior cases, the basics of implant surgery, and prosthetic selection. Incorporating lectures, handbooks, checklists and open discussion, you will be able to place an implant for your pre-selected patient* during the hands-on surgical part of the course, leaving you with the knowledge and understanding to implement proven implant dentistry into your practice.

Course Objectives:
- Understand the principles behind the mechanical design of modern dental implants
- Learn fully CT guided surgery to reduce complications of malpositioned dental implants
- Understand patient selection guidelines
- Learn and utilize the most up-to-date non-invasive implant placement techniques
- Understand pharmacology and emergency procedures
- Learn about surgical and prosthetic treatment planning
- Basic surgical principles: suturing, incisions, flap design, etc.
- Anatomy Review

* Hands-on Live Patient Surgeries
After registering for the class, you will receive a copy of the doctor checklist which includes your patient selection criteria. Attendees are required to complete the checklist two weeks prior to the start of the Implant 101 course.
We know that your team is a vital component to you and the dentistry you provide to your patients. As such, we are excited to offer a team component, for two members of your staff, on Friday, August 21, 2015, to help them get a better understanding of implant dentistry. This component will be taught by an experienced dental assistant providing understanding of parts and pieces, implant organization, scheduling procedures, operatory set-up, and chair-side assisting.

**Course Objectives:**

Overview of the following:

- Implant Surgery
- Inventory Management
- Surgical Kit
- Pre-Op Instructions
- Room Setup
- Surgical Assisting Tech.
- Patient Monitoring
- Drilling Protocols
- Post-Op Instructions
DR. WESLEY MULLINS

Dr. Wesley S. Mullins attained his bachelor’s degree from West Virginia University, and then went on to earn his dental degree from the West Virginia University School of Dentistry. Dr. Mullins completed his general practice residency at the University of Tennessee Medical Center and recently obtained fellowship status in the Academy of General Dentistry. His concentration includes: advanced restorative materials, state of the art dentistry, oral surgery, implant dentistry, and the management of medically compromised patients.

MEGAN RIDENOUR

After completing school for dental assistants in 2007, Megan Ridenour trained under veteran dentist Dr. Joe Rainey DDS in Clinton, Tennessee. After Dr. Rainey retired, she joined Dr. Wesley Mullins’ practice in Powell, Tennessee. As an implant coordinator she manages inventory for multiple implant systems and also assists Dr. Mullins chairside, with parts and pieces used during the implant treatment process. She is well equipped with the skills to present treatment from simple implant dentistry to the complex complete hybrids.

CE Credits

Dental Crafters designates the doctor seminar activities for 18 hours of continuing education credits.

Dental Crafters designates Implant 101 Team Component for Dental Assistants for 9 hours of continuing education credits.

Dental Crafters, Inc. is an ADA CERP Recognized Provider. ADA CERP is a service of the American Dental Association to assist dental professionals in identifying quality providers of continuing dental education. ADA CERP does not approve or endorse individual courses or instructors, nor does it imply acceptance of credit hours by boards of dentistry. Concerns or complaints about a CE provider may be directed to the provider or to ADA CERP at www.ad.org/cerp • Dental Crafters • 1000 Corporate Drive • PO Box 770 • Marshfield, WI 54449 • Phone 1.800.472.8302 • www.dentalcrafters.net
### Seminar Fee:
The seminar includes the treatment plan, surgical guide, custom tissue former or cover screw, implant, two days of lecture and hands-on surgery plus a team component for two members of your staff all for $1,700. The registration fee does not include CT Scan, implant parts, or final restoration.

### Pre-Register Today:
**Phone:** Give us a call at 1.800.995.0626 and send the completed registration form along with a $1,700 check payable to Argon Medical USA. Mail form to Argon Medical USA, Attn: Anne Weiler, 1000 Corporate Drive, PO Box 770, Marshfield, WI 54449.

**Mail:** Send the completed registration form along with a $1,700 check payable to Argon Medical USA. Mail form to Argon Medical USA, Attn: Anne Weiler, 1000 Corporate Drive, PO Box 770, Marshfield, WI 54449.

* **Implant 101 Live Patient Surgery:**
All attending doctors are required to bring a patient to the hands-on portion of Implant 101. In addition, the patient checklist must be completed two weeks prior to the start of Implant 101 course.

Once we receive your registration, Anne Weiler, Implant Solutions Marketing Coordinator, will email you your doctor checklist.

### Cancellation Policy:
A refund, less a $100 administration fee, will be issued if the cancellation is received one week prior to the seminar date. Cancellations received less than one week prior to the course are not refunded.
