

Implant Solutions Exporting from ICAT

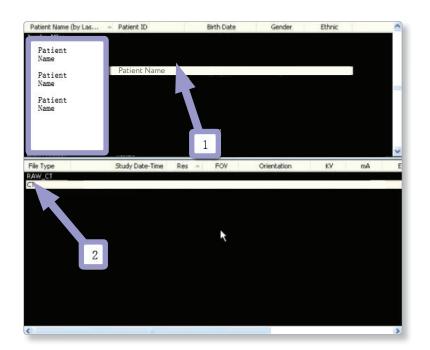

Please follow these instructions if you are exporting from ICAT Software. If you are using an ICAT machine, but have TxStudio / Invivo software, please follow those instructions.

1. Right click on your desktop and select "new" and click on "folder." Rename the folder to match the patient's name.

	View	,		
	Sort by	•		
	Refresh			
	Paste			
	Paste shortcut			
	Undo Delete	Ctrl+Z		
	NVIDIA Control Panel			
	New	•		Folder
	Screen resolution		•	Shortcut
1	Gadgets		-	Contact
4	Personalize			Microsoft Word Document
			1	Microsoft PowerPoint Presentation
				Rich Text Format
			1	Text Document
				Microsoft Excel Worksheet
			0	Briefcase

2. In the patient database, click on the patient name. Under the "file type" click on "CT."

3. Next, click on the file and select "create new workup."

Number	Workup Name	Creation Date
1	Impleit#8	
	2	
		workup to delete

4. Once the patient scans load, in the upper left corner select "tools," "export DICOM" and then "original study."

Plug_ins	•		
Create Report	Date	Gender	
Export DICOM	Or	iginal Study	
Create Export CD		Rotated	
Import Study			
Filter Settings	•		
Hide Study List			
Start 3DVR			
Start Dolphin 3D			
Start 3DMD			
Check Read/Write Access to Image Database			
Setup	ov	Orientation	
U/10/2010 2:11 FWI U.J00	-130.00	LANDSCAPE	

5. Make sure "multi-file DICOM" and "uncompressed" are selected. Next, click on "browse" to choose the export location.

Output Selection Single File DICOM	Multi-File DICOM
	Uncompressed
Us	e Lossy Compression
Destination:	Brows
C:\DICOM Exports	6

6. Select the desktop folder created in step 1 and click "ok."

Please select an export directory.	
Recycle Bin	
CT Training	
EagleSoft.exe	1
De Guide dicoms	
D Logs	
D MISC	
New folder	
1. Patient Name	
1. Phones	2

7. Then, click "ok" when you see the following screen. Your files will begin exporting.

ICOM Export Properties	×
Output Selection	
Compresse	M I V Multi-File DICOM d V Uncompressed lse Lossy Compression
Destination: C:\Users	Browse
	OK Cancel

8. Next, click on "ok" when the "done" screen appears.

Done	

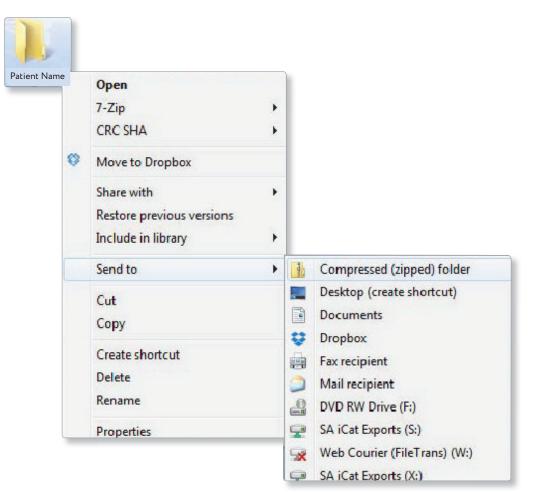

9. After the DICOM exports and saves, go to the patient folder and verify the .dcm files were exported correctly. You should see several hundred files.

10. Right click on the patient folder you created on the desktop and select "send to, compressed (zipped) folder". A duplicate folder will be made with either a zipper on it, or a blue "z."

(If your are following a Dual Scan Protocol, please zip scans individually and label accordingly; example "Patient Scan" and "Denture Scan")

11. Visit Implant Solutions website at www.solutionsforimplants.com and select

"Log in" in the top menu bar. Enter username and password and complete the following:

- 1) Select "new case" and enter patient name
- 2) Click on "add" next to <u>"restorations"</u>and select "Implant Solutions" from the group
- 3) Select a product from the drown down menu
- 4) Select a tooth number and click "ok"
- 5) Click "add" next to <u>"documents."</u> When prompted, select the zipped folder you created above. Select the "I agree to the terms and conditions of sending this case to the lab" checkbox at the bottom of the page.
- 6) You will get a status update as the case uploads.

Note: If you do not have an account created, select "register" and complete the form. Implant Solutions will be notified of your registration. You will receive a confirmation email once the registration process has been completed. Contact Implant Solutions at 1.800.995.0626 if you have any questions.
