Exporting from  
Sidexis 4

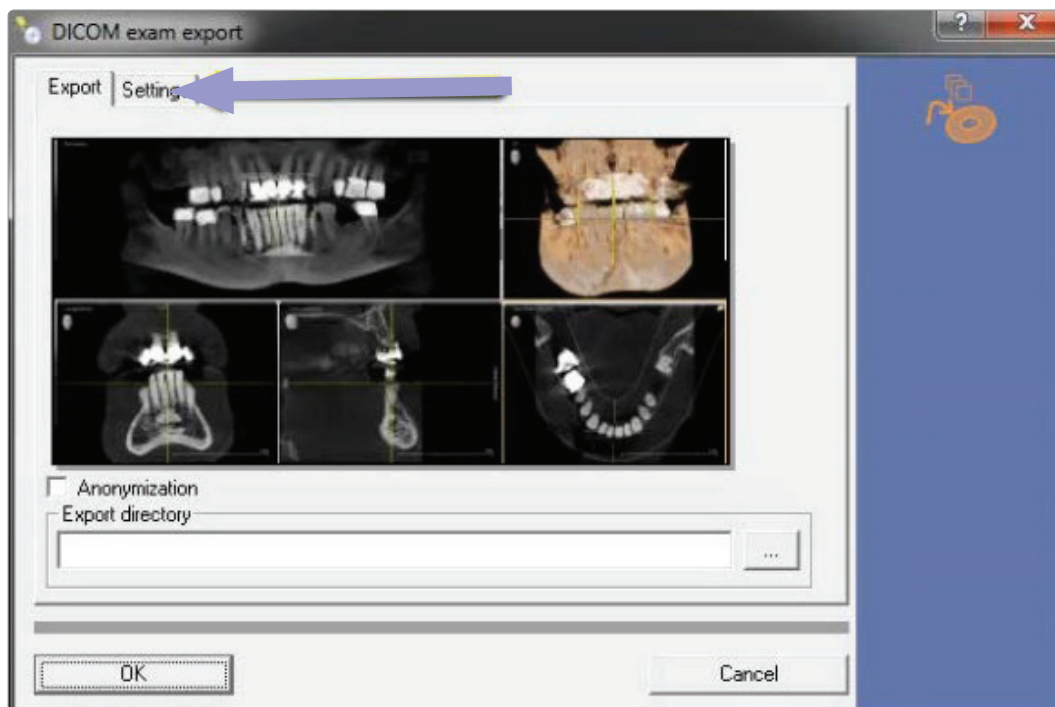

1. Right click on your desktop and select “new” and click on “folder.”  
Rename the folder to match the patient’s name.

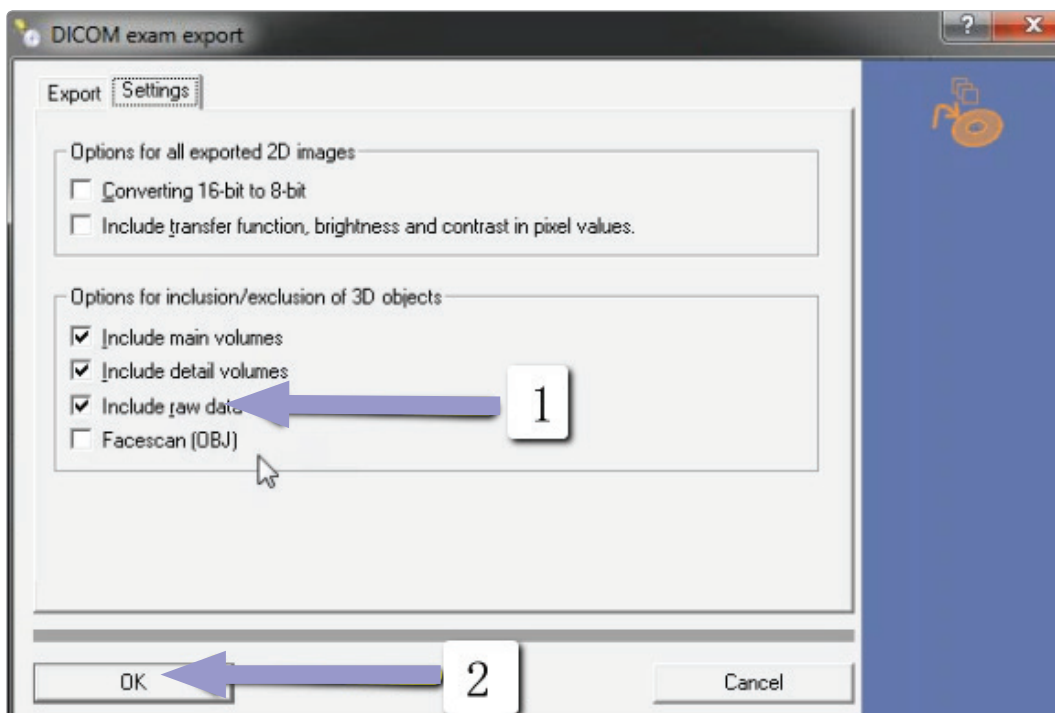

2. Next, go to the patient scan and click on “output,” and then “DICOM exam export.”

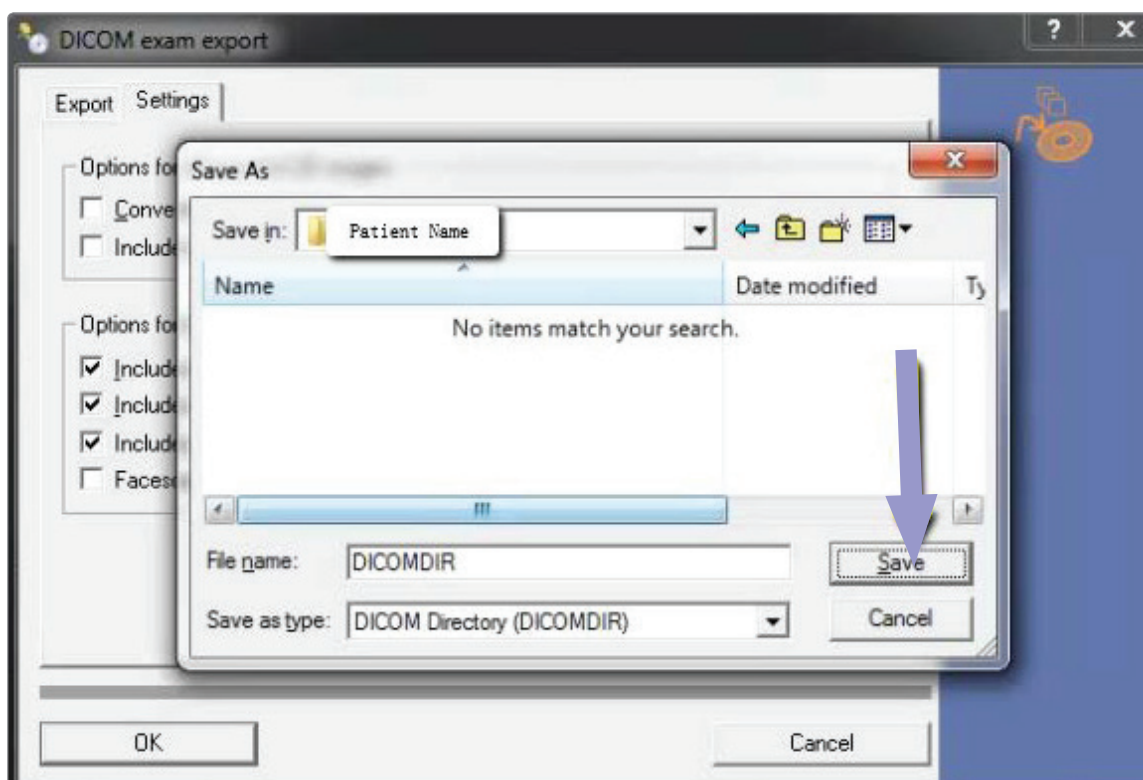

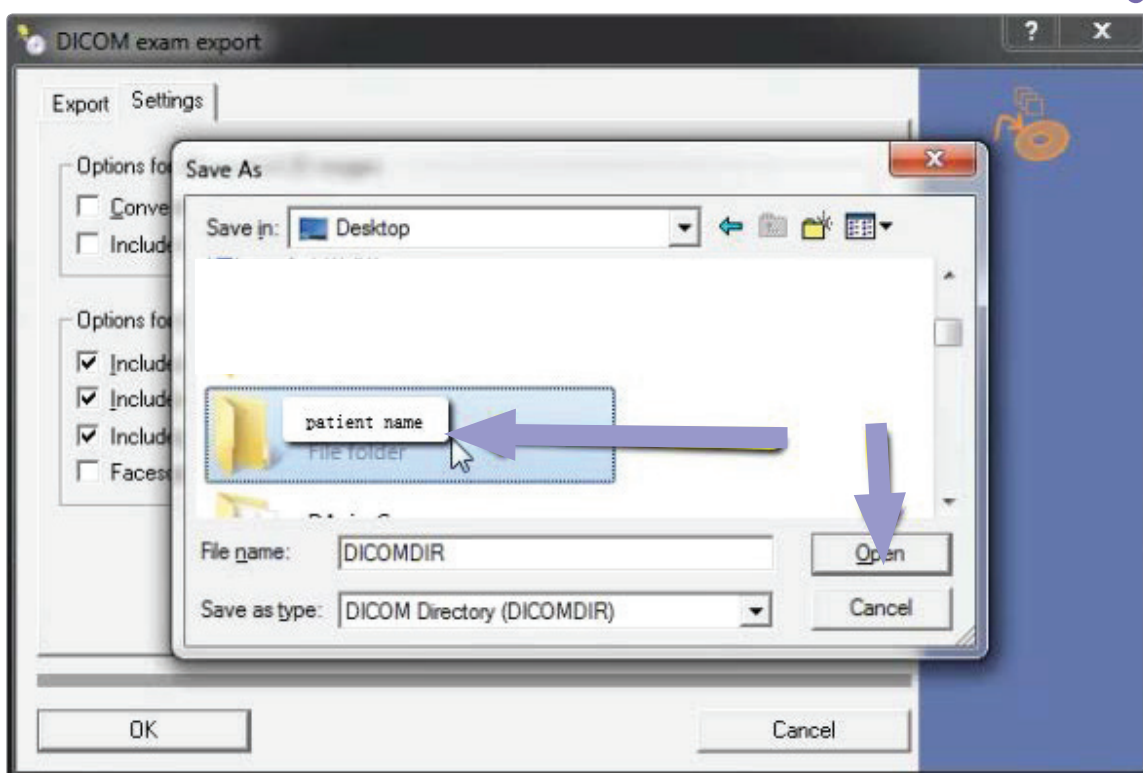

3. Click on “settings” when the next screen appears.

4. Once the “include raw data” is selected, no other options should have to change. Click “ok” to continue.

5. Select the folder you created on the desktop and click “open” and then “save.”

6. Your files will now begin exporting.

7. After the DICOM exports and saves, go to the folder and look for the sub folder named "CT3" (you may have to open a few folders before you see it). Verify the files were exported correctly. There should be several hundred files.

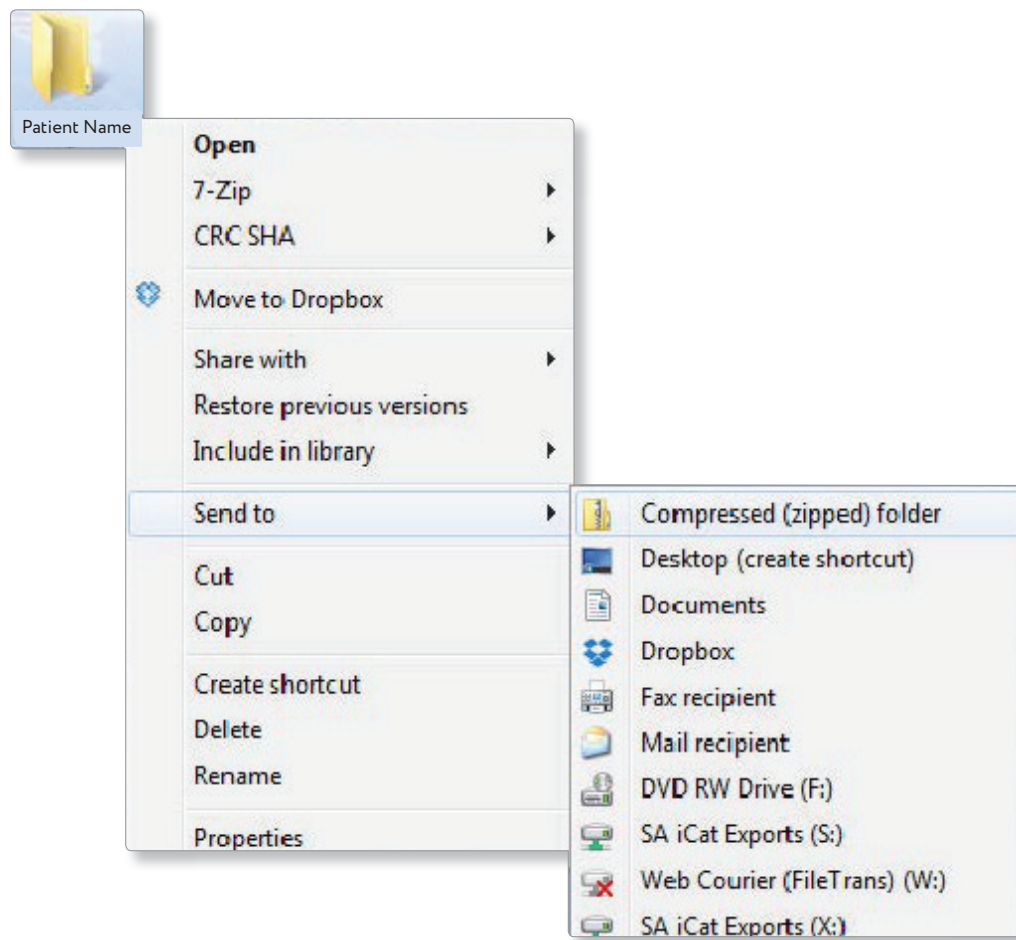

8. After the DICOM exports and saves, go to the patient folder and verify the .dcm files were exported correctly. You should see several hundred files.

9. Right click on the patient folder you created on the desktop and select “send to, compressed (zipped) folder.” A duplicate folder will be made with either a zipper on it, or a blue “z.”

(If your are following a Dual Scan Protocol, please zip scans individually and label accordingly; example “Patient Scan” and “Denture Scan”)

10. Visit Implant Solutions website at [www.solutionsforimplants.com](http://www.solutionsforimplants.com) and select “Log in” in the top menu bar. Enter username and password and complete the following:

- 1) Select “new case” and enter patient name
- 2) Click on “add” next to “restorations” and select “Implant Solutions” from the group
- 3) Select a product from the down down menu
- 4) Select a tooth number and click “ok”
- 5) Click “add” next to “documents.” When prompted, select the zipped folder you created above. Select the “I agree to the terms and conditions of sending this case to the lab” checkbox at the bottom of the page.
- 6) You will get a status update as the case uploads.
